

What is the source of the 5 mio. Euro mentioned in connection with the EFACEC deal?

**The EFACEC deal is structured to maximize the benefits available from Australian Government R&D tax rebate and to make a significant part of the additional payment in the form of a user-royalty i.e. if the technology is utilized in Dyesol solar panels then Efacec will enjoy a small percentage of that revenue in the form of a royalty payment. When a total of €5 million is paid, the ownership of the technology will fully transfer to Dyesol.**

Does the agreement with Tata influence collaboration with Tasnee? Does Tasnee intend to invest further or get involved in another way?

**Any existing agreements with Tasnee and/or Tata are not in conflict and are non-exclusive. Dyesol cannot speak on behalf of Tasnee, however the possibility exists for collaboration with Tasnee in both in materials supply and access to Middle-Eastern PV markets.**

Is Dyesol involved in the EU Graphene Flagship research program?

**Dyesol has direct involvement with EU Graphene Flagship through Dyesol Italia.**
